

Family Recipe Sharing App

Elizabeth Kirschner

Background

Problem

Families have trouble organizing and sharing their family recipes with the next generation.

Target Market

Families with children entering adulthood.

Solution

Collaborative digital recipe organizer.

Value Proposition

Preserve family legacies and encourage experimentation by young cooks.

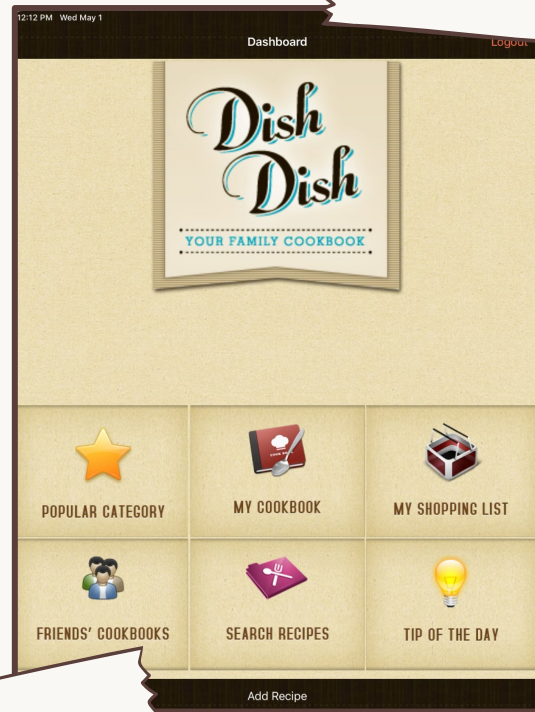

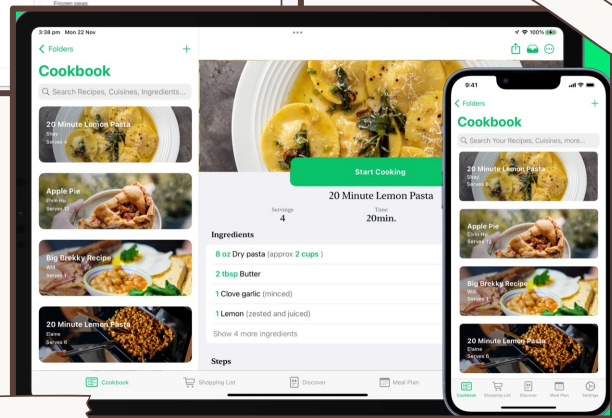

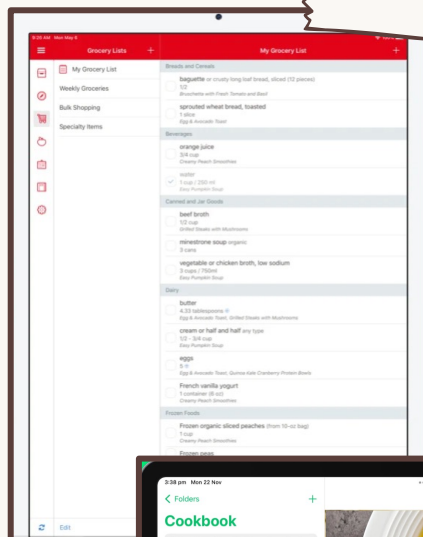

Competitive Landscape

Recipe Organizers
(indirect)

Recipe Sharers
(direct)

Market Gap

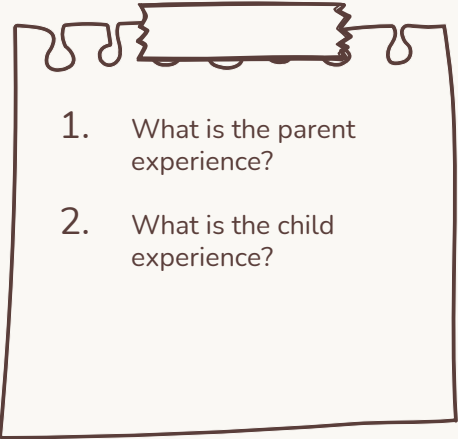

- Intersection of organizing and sharing recipes

Major Needs

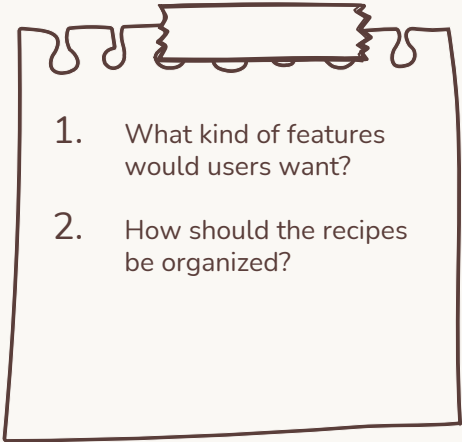

- Collaborative features
- Simple steps to adopt new product

Concept Evaluation

Exploratory Interviews

- 
1. What is the parent experience?
 2. What is the child experience?

Prototype Exploration

- 
1. What kind of features would users want?
 2. How should the recipes be organized?

Interview Findings

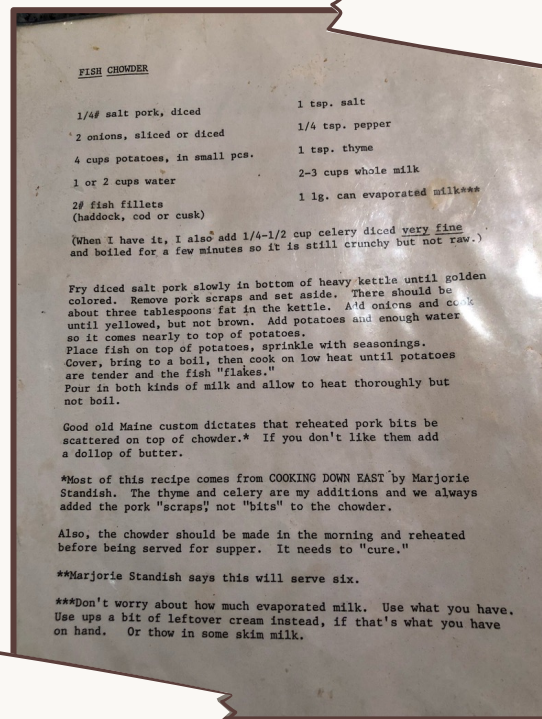

- Moving recipes to an app is perceived as a huge chore
- It takes more than written instructions to pass on family cooking culture

Parents

- Feel it is important to pass on their collected family recipes
- Cooking skills are also important part of the process, not just recipes

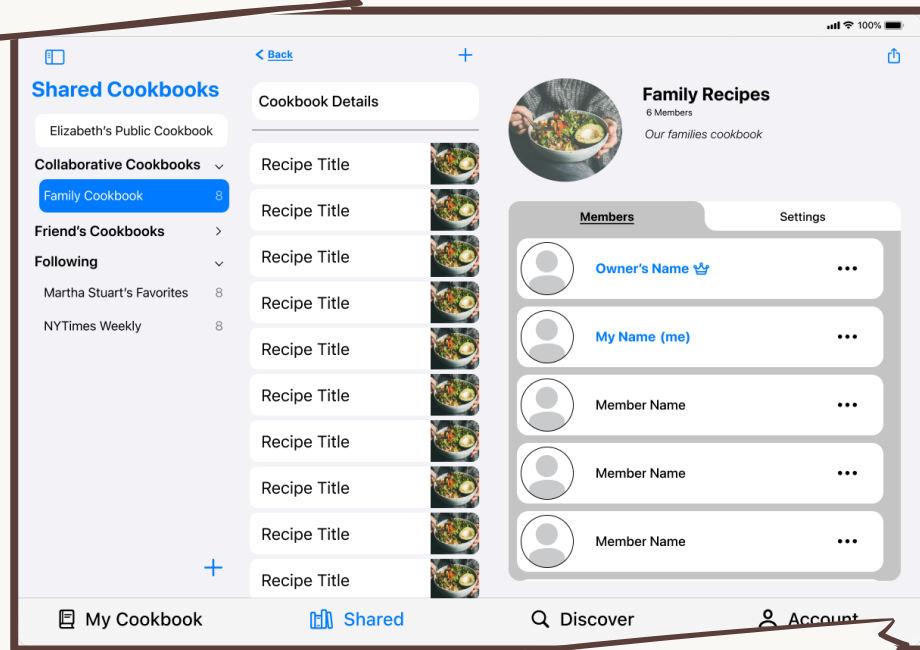

Children

- Want to learn how to cook the food they grew up eating
- Don't have their own organization system
- Have their own twists on family traditions

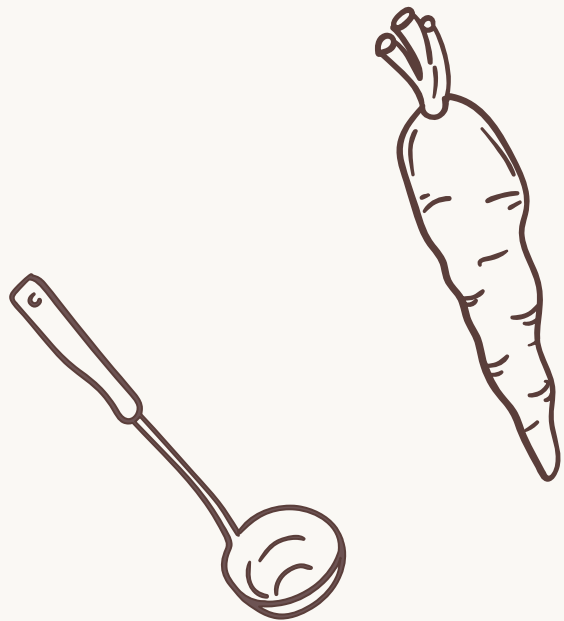

Prototype & Findings

- Users want clear organization of comments, suggestions, and edits to each recipe
- Attribution of each recipe is important to track
- Finding recipes quickly is a priority

Recommendations

1. Broad survey to confirm users need/want this app
2. Prototype and test options for collaborative features
3. Investigate ways to reduce the 'chore' aspect of adopting a recipe organizer
